For your Shoes come to Stokely, Jones & Co. We have the nicest and largest line in the town. Everything in Velvets, Gunmetals and Patents. We have all sizes and widths. This is something no other dealer in the town has ever had. See us before you buy.

## Stokely, Jones & Co.

The Clothiers  
Opposite Depot Newport, Tenn.

### Our New Brand

## Anderson's "Old Glory" Whiskey

AN ABSOLUTELY STRAIGHT GOODS

One gallon in glass or stone jug, \$2.45  
Two gallons, in one or two jugs, \$4.70

This is a Great Bargain. Try It!

WE PAY THE EXPRESS CHARGES

E. L. ANDERSON DISTILLING CO., NEWPORT, KY.

When Parties are Responsible we Ship on Approval

# HAD

You thought; a dozen places on your Xmas list are easily filled by a dozen high-class photographs? Also it would be economy—they cost less. Ask McCoy for an engagement at once, so you may have them in time.

McCoy's Studio, 313 Gay Street, Knoxville, Tenn.

## THIS IS BIG TALK, WE KNOW

BUT WE KNOW WE CAN PROVE IT

The POST Wagons and Hacks will out-run and out-last them all. They have been tried for forty years, and we are as careful today as ever in their construction.

Buy the Yellow POST and Get the Best

FRANK H. POST & CO.

KNOXVILLE, TENN.

# Cleanliness!

## Is Our Motto

We have the cleanest and neatest Meat Market in the city. Everything is sanitary.

Telephone us your order, as our delivery is prompt. The same attention is given to telephone orders as when the customer calls.

We endeavor to have fresh meat on hand at all times. Visit our new Market opposite postoffice.

## H. M. Taylor

Goods delivered to all parts of the City.

'Phone us your orders.

## TIMELY HINTS FOR FARMERS

### The Test For a Profitable Cow.

The percentage of fat in a cow's milk does not, as a rule, indicate whether she is profitable or not, says Hoard's Dairyman. The cow may give milk testing 2½ to 3 per cent and still be a very profitable animal. On the other hand, she may give milk containing 5 per cent fat and be an unprofitable animal.

In order to judge whether an animal is profitable or not it is necessary to know the amount of milk she gives and the percentage of fat it contains. For example, a cow that will produce 10,000 pounds of 3 per cent milk in a year would, under ordinary circumstances, be a profitable animal, but a cow that would yield but 3,000 pounds of 5 per cent milk would not, as a rule, be profitable.

### The Shape of Layers.

Do you know the proper shape for a heavy layer? If you can tell a good layer by her shape you have solved one of the great problems in poultry culture. A bird with a long, deep body, with a broad back and full breast, is the true egg type. There must be a good constitution and a properly shaped body for the creation of eggs and egg cells.

What is necessary today is to breed for the shape that is conducive to heavy laying. It is well, of course, to breed for the other qualities, but the most important should be shape, for upon shape depends the future profit of your flock.

### Dust Baths For Fowls.

Fowls need some kind of dust to roll in, as that is nature's way of freeing them from mites. Road dust is the best of all, and the fowls seem to like it best. At this season of the year it requires only a little time to wheel a few barrels and dump it in some dry place for winter use. Then arrange a frame about six inches deep and three feet square and keep it filled with the dust. Arrange the frame in a sunny place, as the fowls seem to like a bright spot when dusting.

## FEEDING POULTRY FOR WINTER EGGS.

### Be Sparing With Corn, as Fat Hens Won't Lay.

It is not a good plan to keep pullets and mature hens together in the same flock if we wish to get plenty of winter eggs. Laying pullets require and consume with advantage an amount of food that will quickly overfatten the hens, and the fat hen lays poorly or not at all, writes W. R. Fisher in the Rural New Yorker.

When layers of all sorts and ages are housed and fed together, either the pullets will get too little or the hens will get too much, and in either case we diminish egg production and are apt to injure some of the flock.

Overfeeding is to be avoided in fowls of all ages, but it is much easier to overfeed the mature bird than the growing pullet. The tendency to take on fat is common in the yearlings and older hens of all kinds, being most marked in the larger and heavier breeds. In order to avoid overfeeding one must take a good many other conditions into account. Each must study his birds and learn the details of management for himself. Their behavior at feeding time is a good indication of the amount of food that should be given. If they are eager and lively all goes well. If they move about slowly and show indifference the amount of the ration should be cut down.

Breed should be considered. The active, bustling Leghorn will dispose of more grain in proportion to its size and weight than the slow going Cochins. Then the kind of food that forms the bulk of the ration is an item of importance. Look out for the fattening effects of corn. Too much fat puts an end to laying, and it is the cause of much ill health and some deaths in the poultry house in the winter.

### Horse Wisdom.

Better no colt than one from a \$3 sire.

Better shear off the mane where the collar rubs.

The best bed for a horse is a clay floor covered thickly with straw.

Horses working hard in harvest need water several times a day.

Every farm should furnish its own horses at a distinct saving in cost.

A horse with a very full stomach is neither fit for service, work or rapid moving.

In training a colt teach him one thing at a time, and do that thoroughly.

### The Cow Stable.

No factory building needs to be cleaner, drier, better lighted and ventilated than the place in which cows are kept. See that yours enjoy the benefits of these requirements to the best of your means and ability. Even if you go a little beyond "the means" it will generally pay.—American Cultivator.

If you know the difference in marble.  
If you want good quality of marble.  
If you are willing to buy the best for less money.  
If you want the best work on your marble.

See us. We have the goods and want the money and will make prices to please you.

ALLEN MONUMENTAL WORKS.

All \$3 and \$3.50 shoes at \$2.

Metal-faced washboards at 10c.

All 25c stock powders 3 for 50c.

4 pairs good socks for 25c.

See us. We are nearly out of goods and want to finish at once.

No shipments made of less than four quarts or one gallon. You can assort your order if you wish.

All express charges prepaid—delivery guaranteed. 25 cents a gallon increase over regular prices for pints and half pints.

Consumers Distilling Co. Louisville, Ky.

When you write mention this paper.

## NEW TALES THAT ARE TOLD

### An Expensive Guest.

Ernest Schayer, a young New Yorker, has a hospitable heart and a handsome apartment fitted up with all the modern conveniences, among which is a telephone at the side of his bed. His last guest was a young fellow who "just dropped in for a few days" and who stayed much longer. Schayer, who had begun to wonder when the visit would end, returned to the apartment early one afternoon and heard his guest, who was still lying in bed, make the following remarks:

"Central, get me Chicago, number so and so. Hello, Sam! This is Jack. Say, Sam, can you send me twenty by special delivery? I'm stuck in New

"I'LL LEND YOU TWENTY!" SHOUTED THE HOST.

York without a cent. Haven't got it? That's too bad. Goodby. Hello, central; get me Indianapolis, number so and so. Hello, George! Say, can you send me thirty? I'm marooned in New York. Can't spare it? Sorry. Goodby. Hello, central; get me St. Louis, number so and so."

At that point Schayer rushed into the bedroom and grabbed the telephone.

"After you've talked enough long distance to cost me \$40 I'll lend you the twenty!" shouted the host.

"Fine!" exclaimed the guest. "I knew you would, but I was ashamed to ask you for it. That's the reason I was calling up those other fellows."—Popular Magazine.

## CULTIVATING THE YOUTHFUL MIND

### Impression the Circus Made on a Mite of a Lad.

Dr. Elmer Ellsworth Brown, the new chancellor of New York university, was talking about his desire for a larger and deeper study of the arts in American colleges.

"In youth," said Dr. Brown, "the taste is formed, and it will be a taste for fine and beautiful things or else it will be a taste for tawdry and false things. Without great care it will be a taste of the latter sort. Let us be warned by the anecdote of the little Klantone boy.

"This little boy was taken one summer day to the circus for the first time.

"Well, dear, how did you like it?" his mother asked on his return.

"His eyes widened, and he answered with earnest and grave enthusiasm:

"Mamma, if you once went to the circus you'd never, never consent to go to church again in all your life."

### A Delusion.

John Kirby, Jr., the president of the National Association of Manufacturers, was talking to a reporter during the association's recent convention in New York about certain tendencies of modern life.

"These tendencies," said Mr. Kirby, smiling, "look very harmless now, but that is only because we misunderstand them. They are really evil tendencies, and in our indulgent outlook on them we are as deluded as a little Dayton girl I know.

"She took up one July morning a muff that was sadly moth eaten.

"Moths," she said, 'are so nice. It is so easy to feed them. They eat nothing but holes.'"

### A Little Off.

Former Senator Aldrich said to an eager tariff disponent: "My friend, you don't quite understand your subject. Your errors are slight, but they are very ludicrous. You remind me of a little Providence boy.

"What is a ruminating animal?" his teacher asked this boy.

"One that chews her cubs," the lad replied."
